(7) Is the Minister prepared to accept the reasoning behind the statement of Dr. Lawther (para. 102) that the main concern is what the individual is breathing and not what is emitted from power stations or industrial stacks. Does this not imply an abdication of long-term control. (8) Does the Minister still accept the proposition in paragraph 129 of the Report that “in this Port Maitland study, we are dealing only with the effects of inorganic fluorides, and these only on a quantitative time basis, which may result in a demonstrable effect of chronic fluorosis.
